Monetary. For the past week we notice a steady demand for money, which our Banks have not been able to supply. They are still discounting sparingly, and the rates on the street continue high. We report sales of Corporation Stock at 85c. In other local stocks, there is no activity. The war news and the heavy shipments of specie from New York during the past week, have tended to increase the rate of interest, and to depress the Stock market, though opinions on men and things, than as a valuawe notice sales of Virginia 6's at 97, an increase | ble contribution to a history which has been of 32 7 cent. on last week's quotations, which is highly gratifying in the face of the general depression. Land Warrants are lower, but we are without quotations.

The Baltimore American says :- By the arrival of the steamer Asia at New York, we are put in possession of Liverpool dates to the 14th inst. In a commercial point of view the advices are unimpertant, except that the general tone of it may have the tendency to give more steadiness to the markets on this side. The most notable item in cotton. This, we think, was not looked for here at this time, and was perhaps the result of the former declaration on the part of England that she will firmly maintain a position of strict neutrality.

Bread-tuffs closed with an advancing tendency, but this will not be of any importance to us, as our markets are already much in advance of those on the other side of the water. As yet the only perceptible effect the news has had on our market to stiffen the views of holders of Flour and

this country this week, have not interfered as yet with our money market. The largest shipment of specie we have ever noticed was made steamer Persia, which left New York, on Wednesday; the amount was a fraction over \$3,000,000 this added to the large amounts shipped by the steamers immediately preceding the Persia, was thought would make a very serious disturbance in inancial circles. We are, however, doing too little business at this time to have any material strinsusiness at this time to have any material strin-gency in the money market; besides we have an offset to the large export by the arrival of the steamer Moses Taylor at New York with nearly \$2,000,000. It is not likely that the shipments of specie in such large quantities will continue much longer, as the prospects now are that England will want our cotton and breadstuffs, in order to supply the demand that will be made on her manufact

Capital is plenty both at bank and on the street. and there is no difficulty in placing good paper at former quotations. We quote first class double paper at 7@71 P ct.; single at 8@9 P ct., and call loans with good stock collaterals, at 6(67 7 cent. The banks are discounting to the extent o

their receipts. Stocks are still inclined to improve, and the leading Railroads have no doubt witnessed their greatest depression for the season. After next month we may look for a large increase in quantity of freight to be carried. From all the accounts which we are enabled to gather, of the growing crop, we may expect after harvest to see the roads connecting the West with the Seaboard, doing an excellent business, and consequently, they will yield handsome returns. There were but few transactions made at the Stock Board to-day, but everything on the list showed an upward ten dency. In Baltimore and Ohio Railroad shares there was a much better feeling, and the sales show an advance of 50 cts. 2 share.

LONDON QUARTERLY REVIEW FOR APRIL. -The political article of this number-"Foreign Affairs-War in Italy"-will be read with unusual interest at the present time, as it discusses the views and position of Austria. In a review of Carlyle's Frederick the Great, the conclusion is arrived at that the work "may be more fairly regarded as a vehicle for the expression of the author's so often written and which thus far he leaves much in the same condition as he found it." An important paper is that on Bunsen's

Egypt and the Chronology of the Bible. The remaining articles, The Minstrelsy of Scotland, National Gallery, Devonshire, George III, and Charles James Fox, and Lord Brougham and Law Reform, afford a welcome variety to the number. The paper on Devenshire, in particular, adds a valuathe intelligence, commercially, is the advance in ble chapter to those local histories which have formed so pleasing a feature in some of the recent quarterly publications. Republished by Leonard Scott & Co., 54 Gold Street, New York, who also reprint the North British, Westminster and Edinburgh Reviews, and Blackwood's Magazine; at \$3 a year singly, or \$10 a year for the whole five Periodicals.
